GETTING STARTED

WARNING: NEVER TRY TO INSERT OR REMOVE A GAME PAK WHEN THE POWER IS ON!

• Turn the power OFF on your N64.
• Insert the Game Pak into the slot on the N64. Press firmly to lock the Game Pak in place.
• Turn the power switch ON. After the appearance of the title and legal screens, you may bypass at any time by pressing the START Button.

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding down the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center.

THE RUMBLE PAK

This game supports the Rumble Pak Accessory. Follow on-screen instructions when prompted to insert or remove your Rumble Pak.

*IMPORTANT WARNING*

Do not remove the Rumble Pak from the Controller unless instructed to do so. Doing so may cause the game to operate improperly and/or cause damage to the Pak.
Before you begin your game familiarize yourself with the controls.

- Control Pad or Control Stick Up, Down, Left or Right to highlight or toggle options
- Press the A Button to select options

Press START to pause the game. To quit a game in progress, press the START Button. The Pause Options Screen will appear. Highlight Exit Game, then press the START Button. Confirm your choice by selecting Yes at the Continue Screen.
A growing terrorist group, called 'Guren-no-kiba', is using its various factions all over the world to commit subversive activities on a large scale worldwide. They've acquired dangerous weaponry by way of thievery, kidnapped American scientists and have their own proprietary technologies. Their ultimate goal is to create an android soldier that will most likely make the 'Guren-no-kiba' unstoppable.

You are part of a special group of skilled, international special forces with one objective...Destroy the 'Guren-no-kiba'!

Because their main headquarters are located in deep canyons, you will be outfitted with several, powerful prototype choppers that include a wide array of weaponry. It's up to you...take 'em out!
Take to the air and practice maneuvering your chopper and destroying various targets.

**TRAINING**

Pick a pilot, chopper and weaponry to begin your Training. There is no time limit and enemy vehicles will not fire at you (only on Level 1). Pay attention to your fuel supply, though. It does diminish during training.

**DATA LOAD**

When you Train, your training progresses to different stages of difficulty. As you complete the game's Missions, more stages will become available to you at this option. Just select the stage you want, then press the A Button to go to the Player Select Screen.

At the Option Screen, Press the Control Pad Up or Down to select an option, then press Left or Right to highlight the setting you want. Select Exit when you're finished making changes. Here are the options:

**CONTROL**

Chopper Attack offers 2 controller configurations to choose from. See Game Controls, pg. 6, for diagrams of both configurations.

**LEVEL**

Select the game's difficulty setting. Press the Control Pad Left or Right to highlight Normal or Expert.

**BGM (BACKGROUND MUSIC)**

Turn the game's background music ON or OFF.

**SOUND EFFECT**

Turn sounds effects ON or OFF.

**DATA CLEAR**

If you have data saved on your N64 cartridge, you can delete files you don't need using the Data Clear option. Press the Control Pad Up or Down to select the data file you want to clear, then press the A Button to delete it.
After you select a **Mission** or **Training** exercise, you'll need to select a pilot and his/her chopper. Press the **Control Pad Left** or **Right** to cycle through the pilots and their choppers.

Press the **L Button** to view more data on the chopper's speed, Armor Plating, Vulcan, Acceleration Capacity and Acrobatic Ability. Each feature is rated with up to 5 stars. Select the **B Button** to go back.

When you find the pilot and chopper you want, press the **A Button** to go to the Mission Briefing Screen.

The Mission Briefing Screen tells you what your objective is for the mission. Follow your orders to the tee, because you don't have much time and fuel to complete the mission. The more you mess around, the harder it will be to finish your mission.

The Area Map Data Screen shows you a detailed 3D view of the map in which your mission will take place. It displays your Targets, the number of enemies and certain Enemy Information. Take a good look at the map, then go blow 'em out of the sky! Press the **A Button** to go to the Select Weapons Screen.

This is your last task before your mission or training session begins. It's also the most fun. Select one of 8 different types of weapons to strap to your chopper. Move the **Control Stick Up** or **Down**, **Left** or **Right** to select a weapon, then press the **Control Pad Left** or **Right** to buy weapons 10 at a time. To buy a weapon one at a time, press the **Control Pad Up** or **Down**.

Your chopper can hold up to 5 different weapons, depending on the chopper type. Highlight each weapon to read the displayed information about that weapon. As you buy weapons, your Money will diminish (quite rapidly of course). When you've loaded your chopper, press the **Control Stick Down** to highlight Buy, then press the **A Button**. Select **Yes** to begin the mission.
The weapons you use during battle each have their own special abilities. It's important to manage each weapon with precision to complete your mission alive. Here are the weapons:

**Vulcan Bullet**
Press the Z Button to utilize this standard weapon. Your chopper has an unlimited supply of these Vulcan Bullets. However, the power of this weapon is not as strong as the other weapons you will purchase. In actual fighting, it can be used to destroy vehicles, radar stations or other buildings.

**AGM (Air to Ground Missile)**
This is an on-land homing missile. It has the ability to lock on to tanks, among other on-land enemies.

**AAM (Air to Air Missile)**
This is an in-air homing missile. It has the ability to lock on to enemy combat planes and helicopters. You must lock on your target before you fire, or this missile will fly straight.

**AGAM (Homing Missile)**
This missile has the ability to lock onto both on-land and in-air enemies. You must lock on your target before you fire, or this missile will also fly straight.

**Cluster Bomb**
This bomb can collectively destroy on-land enemies and buildings. This powerful weapon will likely become your main land weapon. It drops straight down, then inflicts tremendous damage to everything in its wake.

**Dummy Countermeasure**
This is a great defensive weapon. Fire one of these to thwart an enemy missile that is locked onto your chopper. When the enemy's homing missile fires, a warning message will appear at the bottom of the screen. If you fire a dummy countermeasure at this point, the enemy missile will fly toward it and avoid your chopper.

**Rockets**
These straight fire rocket missiles have 10 shots. The trajectory is the same as the Vulcan bullet but it has a wide attack range of precision for on-land attack. It can be used for all on-land enemies and in-air targets.

**Homing Cluster**
Oh, this is a nice one. It is the most powerful weapon at your disposal and is used to home in on both in-air and on-land enemies. These are very expensive, so make sure you use them timely and accurately to benefit from their awesome power.

**Locking on Your Target**
AGM, AAM, AGAM, and the homing clusters, have a common function. When locked on, they will pursue and sometimes destroy their target. When the enemy comes within firing range, a square target cursor will appear, and a cross will accompany it. The cross changes to a circle when you have a lock on your target. When a lock-on weapon is fired, the target will automatically be pursued.
Examine the main game screen to get familiar with the important information you’ll need during battle.

**SPECIAL WEAPONS**
The weapons you purchased will be displayed here. As you select your weapon, the remaining amount of that weapon will be displayed below the icon. Press the A Button to toggle the weapons from left to right. Press the B Button to go in the opposite direction.

**Note:** Any weapons you have remaining after the mission, will be cashed in for money.

**RADAR SCREEN**
The green triangle in the middle of the radar screen represents your chopper. The inner green circle represents your field of view, and the blue area is outside your field of view. Here is a breakdown of the color coded targets (dots) you’ll see:

- **Red dot** - The enemy missile’s position
- **Blue dot** - Combat planes and other enemy aircraft
- **Yellow dot** - Tanks and other enemy land crafts
- **White dot** - Ally helicopters’ location
- **Green triangle** - Your position

**TARGET WINDOW**
The Target Window displays the amount and positions of your remaining mission targets.

**MISSION MAP**
This map displays the entire map of your mission. The green triangle is your chopper, and colored dots represent these elements:

- **Red dot** - Shows present target positions
- **White dot** - Shows the heliport’s position
- **Green triangle** - Indicates the player’s position

**SHIELD GAUGE**
With this gauge, you can monitor the status of your protective shield. When you are attacked, or come in contact with the enemy, the red will diminish. When the shield is completely gone, your chopper goes down and the game is over. Not good.

**CAPTURE/RESCUE WINDOW**
The icon on the left shows you the number of POW’s they’ve captured. On the right, view the number POW’s you’ve helped rescue safely from enemy territory. Any captives that you fail to rescue or accidentally kill will cost you some money, so avoid friendly fire and NEVER LEAVE A MAN BEHIND!

**FUEL**
Now, this is one of the most important gauges. Keep an eye on it. When you run out of gas, YOU’RE TOAST and the game is over.

**SCORE**
As you destroy everything in sight, your score will increase. Obviously, try to get the highest score possible - it will be converted into money. You’ll need it to continue buying the best weapons.
RESCUING CAPTIVES
One of your important duties is to rescue captives. After you clear your mission of rescuing captives, your prize money will increase.

WHEN YOU DESTROY THE TROOP CARRIERS & PRISON BUNKERS
When you destroy a troop carrier or prison bunker, the captives will be freed. Don’t use a cluster bomb or other very powerful weapon. You’ll end up destroying not only vehicles and buildings, but also injuring captives. If you use a weak weapon, you’re less likely to kill any of the hostages.

DAMAGE TO THE HELIPORT CLOSE GATE
When you destroy the troop port and prison bunkers, the captives walk out to the nearest heliport. You must clear out the 4 gates of the heliport so the rescue helicopter can land and pick them up. The helicopter will then land and the captives will return to the base camp successfully.

MONEY
It makes the world go round as well as your missions. After clearing a mission, all of the remaining weapons will be converted to money (half the buying price). Any weapons you have remaining after the mission, will be cashed in for money. Your score will also reward you with money. Try to run it up and cash in. Also, if you rescue captives successfully, you will be awarded cash.

Note: All cash awarded will help you buy the best weapons at the Select Weapons Screen (see Select Weapons, pg. 13).

REMAINING ENEMIES
In each stage, the total number of enemies that appear is decided in advance. The remaining enemies that you did not destroy in the first stage, will be carried over to the next stage. The closer you come to destroying all enemies on one mission, the more your chances for success in the next mission increase.

While in combat, you can destroy the enemy facilities to expose several Power Up items that will help you extend your resources and complete the mission successfully.

HOW TO OBTAIN THE ITEMS:
Destroy the enemy’s land facilities to expose any power ups. If you find one, the item discharges upward. To obtain the power up, you must fly your chopper over the power up so that it makes contact with you.

The items that appear will be discharged a few times, then explode, so get them quickly. You don’t want to be hovering in one place very long anyway; you’ll find yourself a target for other aircraft and tanks.

THE POWER UPS YOU’LL FIND
White Container - Repair Items. Your shield will be restored.
Green Container - Fuel Tank. Your fuel will be partially restored.
Blue Container - Money.
Red Container - Increased Gun Power to your Vulcan Gun.
Black Container - Explosive trap. You don’t want this.

VULCAN BULLETS INCREASED POWER
If you find a Red Container, the power of your Vulcan Gun increases up to 5 times more (depending on how many Power Ups you find). Remember this:
- In the first stage, you can obtain two of the red containers, and the vulcan power will increase 4 times (for the Fire Cat only).
- The increased power of the vulcan gun is only valid during the current mission. It returns to its original condition in the next mission.
ALICIA ANDERSON
Female, 29, Russia
Russian Army Helicopter Pilot. When she enrolled in the army, her speech and behavior were a disaster and she was sent to fly to a remote region. There, she met Commander Robinson who suggested she enlist. She jumped at the chance. Because she executes her duties without emotional distractions, they call her Ice-Woman.

CHOPPER TYPE: KOLINSKY
This chopper can utilize many different weapons. It also has some pretty strong armor as well as good acceleration.

ANDY FELLOWS
Male, 42, England
Andy Fellows is quite stubborn and has a real problem with authority, so he's often in trouble with his unit commander. But his expertise gets him out of trouble, and the Chopper Attack unit is usually willing to put up with his attitude.

CHOPPER TYPE: WASP
It's small, but fast and very maneuverable. It only carries 3 weapon types, but it's speed will make up for that limitation.

DANNY GREGG
Male, 54, American
American Navy, Special Forces Combat, Helicopter Unit. Gregg has been flying Choppers longer than any pilot in the unit. His keen eye and fast reflexes haven't diminished at all over the years. He has no regard for his enemies.

CHOPPER TYPE: WHALE-32
With strong armor plating and good Vulcan Bullet accuracy, the Whale can take a shot, yet inflict heavy damage with or without special weapons. It can carry 5 special weapons.

EMMA BALDWIN
Female, 22, American
American Army Helicopter Pilot. She's young and inexperienced, but this doesn't seem to stop her from taking out enemies and achieving all of her past missions. She's an army commander's daughter, but flying in the Chopper Attack unit has always been her one desire.

CHOPPER TYPE: FIRE CAT
This is an unusually designed chopper, but well built, agile, fast and it carries 4 weapons. This should help out maneuver the enemy as you rain Vulcan bullets and missiles on them.
**JUN MOTOFUJI**  
**Male, 35, Japanese**  
Jun always desired to have the same occupation as his parents. From the time he was an infant, he circled the world with his parents and excelled at helicopters at a young age. He feels very much at home in the **Chopper Attack** unit.

**CHOPPER TYPE: RETSU**  
Retsu has an old type body, but its abilities are not diminished at all. It looks like an airplane, it's fast and it has great acrobatic abilities, and it carries 3 types of special weapons.

**MIKE ROBERTS**  
**Male, 24, American**  
American Navy Combat Unit helicopter pilot. He handles the helicopter very well but because of his youth and recklessness, his commanders are constantly pulling their hair out trying to control him.

**CHOPPER TYPE: SKY TURBO**  
This chopper has excellent balance. It is solid in all areas. It carries 3 types of weapons and is very comfortable to fly.

**HIROMITSU GOODMAN**  
**Male, 25, American**  
Belongs to the repair unit within the Army. He signed on with the **Chopper Attack** unit as a favor to a high ranking friend. He refused to fly any other kind of chopper, so they outfitted his hand-built Repair chopper into a flying tank.

**CHOPPER TYPE: GA-GA**  
Hiromitsu made this helicopter with his own hands and wants to try out its abilities. It carries 5 different types of weapons and it's strong, but it's also a bit slow.

**JOHNNY GIV**  
**Male, 32, American**  
Belongs to the American Navy Special Forces Combat Unit. Not much is known about Johnny. He keeps to himself mostly. But his excellent flying skills and kill ratio keep him in the air. The unit is happy to overlook his quiet demeanor in exchange for expertise.

**CHOPPER TYPE: HARD BULL**  
Being a fast compact helicopter, its handling and mobility are excellent. It carries only two special weapons, but it's hard not to try this easy to fly speed demon.
Press the **START Button** during the game to view the Pause Options Screen. You can make on-the-fly changes to your Controller configuration (**Control**), background music (**BGM**) or sound effects (**SE**). See **Options**, pg. 10, for details on these options. Select Continue to return to your game. To leave a game in progress, highlight Exit then press the **START Button**. Confirm your choice by selecting **Yes** at the Continue Screen.

### MISSION RESULTS

After you clear your mission, the Results Screen will display the money you possess. It will increase and decrease accordingly, depending on your mission performance. If you have a lot of money, you can buy better weapons. Your chances of success in your next mission will then increase.

WARRANTY

MIDWAY HOME ENTERTAINMENT INC. warrants to the original purchaser of this Midway Home Entertainment Inc. software product that the medium on which this computer program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This Midway Home Entertainment Inc. software program is sold "as is," without express or implied warranty damages of any kind, and Midway Home Entertainment Inc. is not liable for any losses or damages of any kind resulting from the use of this program. Midway Home Entertainment Inc. agrees for a period of ninety (90) days to either repair or replace, at its option, free of charge, any Midway Home Entertainment Inc. software product, postage paid, with proof of purchase, at its Factory Service Center.

This warranty is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the Midway Home Entertainment Inc. software product has arisen through abuse, unreasonable use, mistreatment or neglect. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES AND NO OTHER REPRESENTATIONS OR CLAIMS OF ANY NATURE SHALL BE BINDING ON OR OBLIGATE MIDWAY HOME ENTERTAINMENT INC. ANY IMPLIED WARRANTIES APPLICABLE TO THIS SOFTWARE PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE NINETY (90) DAY PERIOD DESCRIBED ABOVE. IN NO EVENT WILL MIDWAY HOME ENTERTAINMENT INC. BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM POSSESSION, USE OR MALFUNCTION OF THIS MIDWAY HOME ENTERTAINMENT INC. SOFTWARE PRODUCT.

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages so the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.
